Col. W. A. Leitner
Marine Corps Equipment Center
Quantico, Virginia

Dear Col. Leitner:

You will recall that I was pretty unhappy with the Missiles and Rockets article citing WADC work on a marvelous \$1,000 "do everything" type missile. Apparently some of the guys at the Applied Physics Laboratory felt that they could even out do this and you may find their note to the editor as amusing as I did. I think the test set is a pretty novel approach.

Respectfully,

STATOTHR
